**In brief:-**

Web designing has come long way. Especially web designing in the past, they were designed by heavy, large and expensive systems programming that would not be carried and had to be link via network. Today, however we can build small website (Static) with numerous online software's and tools that are designed by inexpensive, small and light computer system. Also with the invent of cheaper macromedia system tools it has now become possible for multiple link to interface with each other and do a particular task also known as CLUB FIRST Techno edusolutions Pvt. Ltd. **This workshop presents a unique combination of web designing, web flash design, web hosting and search engine optimization.** The focus of this workshop is to introduce to the students various methods of web designing that can be used to build own website in Google first.
